

INVICTUS Drosophila Incubator Delivery Waiver

Pictured: Cat # 59-400

Your INVICTUS Incubator (Cat# 59-400, 59-400L or 59-400LH) will arrive palletized (4 bolts secure the incubator to the pallet and it is cardboard wrapped to ensure the unit arrives intact without damage). The dimensions of the incubator with packaging are 36 x 43 x 84". Uncrated, the actual incubator dimensions are 27.9" X 33" X 79" and the weight is 127Kgs (280lbs).

Genesee Scientific cannot take responsibility for delivery of your incubator to the laboratory. Your signature below will serve as your acknowledgment and consent and that:

- Genesee, through common carrier, will ship to the loading /receiving dock of the address on the order and not directly to the laboratory.
- Genesee will not be responsible for any moving and/or set up charges.
- "White Glove"* delivery service is not included with standard delivery, but can be coordinated with Genesee through a third party company at an additional charge. White glove delivery includes in-lab delivery, unpacking and clearing away packaging materials.
- 17% restocking fee plus shipping charges apply to all returns.

***White Glove Service** - If you elect this 3rd party service, **DO NOT** sign this document. Upon confirmation of delivery, Genesee will help you coordinate a "white glove service" company. As this service is not associated with Genesee, the incubator will need to be kept and stored while arrangements are coordinated. White glove inside delivery consists of bringing the unit into the lab, unpacking and placing the unit and clearing away the packing materials. White glove service is limited to distances of 2-3 hours from major metropolitan areas. Should your delivery address be more than 3 hours from a major metropolitan area, Genesee will provide a special quotation for the white glove service.
